

# Abhijit Sahoo

First name:AbhijitAddress:Hyderabad, IndiaLast name:SahooPhone number:8908563840

Date of birth: 22/05/1994 Email address: abhijitsahoo.ds@gmail.com

Nationality: Indian

# 👤 ) Profile

- Team Leader in BFS analytics with 5 years of work experience with domain knowledge in Banking & Financial, Industrial and Aerospace.
- Technical skills include hands-on programming in **R** and **Python programming** and **Machine Learning** algorithms. Driving solutions through deployment of Machine Learning algorithms (**R/Python/Alteryx**).
- Ability to calculate KPIs and it's variants and mine hidden values from sets of structured, semi-structured and
  unstructured data. Ability to leverage machine learning algorithms and applied Statistics with visualization and a
  strong sense of Data exploration.

### Work experience

07/2015 - 10/2018

#### Engineer

L&T Technology Services, Bangalore, Indian

- Deputed to France for 1 year to handle individually the "Airbus of France Project" through "AKKA Technology".
- Flight Delay Analysis: Analyzed historic flight data for Air France to build a predictive model for determining flight delays; given a set of flight characteristics. Built a Tableau Dashboard summarizing destination-wise delays, weekday/weekend stats, travel-time delays, Carrier Dependent delays, weather dependent arrival/departures. summarizing the analysis. Significantly decreased the loss (~22%) incurred by Air France due to delays.
- Frequent Flyer Program: Worked closely with AKKA Technologies for developing models using Hierarchical and K-Means algorithm on datasets specific to customers of Air France Frequent Flyer Program. This analysis was aimed towards learning customer travel behaviors and targeting different customer segments with different types of mileage offers.

02/2019 - present

#### Team Leader

Cognizant Technology Services, Hyderabad, India

- Exchange Funding: Analyzed Funding data of UBS of different time zone and region (EMEA, APAC and NA). Applied Exploratory Data Analysis before processing, cleansing, and verifying the integrity of data used for analysis (Alteryx/R) on Exchange Funding Project.
- 1. Combine data from multiple Sources (.csv, excel, text file also .PDF)
- 2. Creating and implementing data-driven strategies that fuel growth including revenue and profits (Alteryx/R).
- 3. Auto holidays calendar and Error handling and Log files generate technique also added in this project.
- OTC Bonding: Analyzed HSBC OTC data of different Venders and Brokers of different regions (EMEA, APAC and NA). Applied Exploratory Data Analysis before processing, cleansing, and verifying the integrity of data used for analysis (Alteryx/R) on HSBC OTC Bonding Project.
- 1. Automate Reconciliation Process.
- 2. Created and implemented **OTC automation GUI for HSBC bond Project** using **Rshiny** and **R**.
- 3. Manual effort decreases 100%.
- RAS Project: Trades needs to be reviewed timely for different regions like [APAC(Japan,Australia, Zurich, Bunting), EMEA, NA etc.) and reconcile/identifying the breaks in trades of the each regions rec, comments need to be updated according to the discrepancies identified after investigation ,standard client required formatting need to added and then prepare the EOD reports and send same to the OP's DL team to further investigation.

### Work experience

- 1. Alteryx workflows w.r.t each region investigate and classifies trades into segments/categories based on multiple parameters like Quantity, Price, CCY, Trade date & Value date and prioritizes/highlights the trades in color formatted within each segment for operations associate to focus on.
- 2. User can Easily access the user interface and enable the user to do this entire manual process by single click and get the results within seconds to **1 minutes**.
- 3. Deploying the Workflow Solution without any cost to OP's team through **Alteryx Server.** Upload/download data from web **through Alteryx Server.**
- <u>ETD Trade Project</u>: Based on Agreement ID, the Daily reports needs to reconcile with Broker list, Sales contact, Master file and LOT Size of the each Maturity Investment for different regions like [APAC(Japan, Australia, Zurich, Bunting), EMEA, NA etc.) and comments need to be updated according to customer/trader Mapping. standard client required formatting need to added and then prepare the EOD reports and send same to the OP's DL team to further investigation.
- 1. Auto Mail Triggering and Submit email to an email server through SMTP protocols.
- 2. Once **Daily report** has created, then create the **weekly report** and **Monthly report** automatically.
- 3. Using interactive charts, we can created **bar Chart**, **dual axis charts** for better **Data Visualization**.
- 4. Using **Spatial in Alteryx workflow**, we can estimate the region wise profits and revenue.
